

ICD-10-CM A&P Module: Chapter 7 - Diseases of the Eye and Adnexa (H00-H59)

Course Description

The **ICD-10-CM Module: Diseases of the Eye and Adnexa (H00-H59)** is designed to enhance coding professionals' knowledge in anatomy, physiology, and pathophysiology terminology for conditions related to medical and surgical procedures for the eye and adnexa. It also reviews the ICD-10-CM codes as it relates to these conditions. This module concludes with a 20-question final self-assessment test to assess your practical knowledge of the skills reviewed.

Learning Objectives

- ✔ Review the anatomical structures pertaining to the eye and adnexa
- ✔ Identify the functions of various eye and adnexa components
- ✔ Compare major differences between the ICD-9-CM and ICD-10-CM relating to the eye and adnexa
- ✔ Discuss common pathophysiology affecting the eye and adnexa
- ✔ Understand where to find codes in the eye chapter categories and the rationalization for their arrangement
- ✔ Explain the ICD-10-CM Official Coding Guidelines for glaucoma
- ✔ Know where to find combination codes affecting the eye in the eye chapter as well as other chapters of the ICD-10-CM code book

This course also qualifies for **2 hours** towards AAPC and AHIMA's new ICD-10 CE
